System Requirements

- Ethernet-based Cable or DSL Modem
- Computers with Windows, Macintosh, or Linux-based operating systems with an installed Ethernet adapter
- Internet Explorer Version 6.0 or Netscape Navigator 7.0 and above

Package Contents

DI-LB604 Load Balancing Router

CD-ROM with Manual & Installation Guide

CAT5 Ethernet Cable

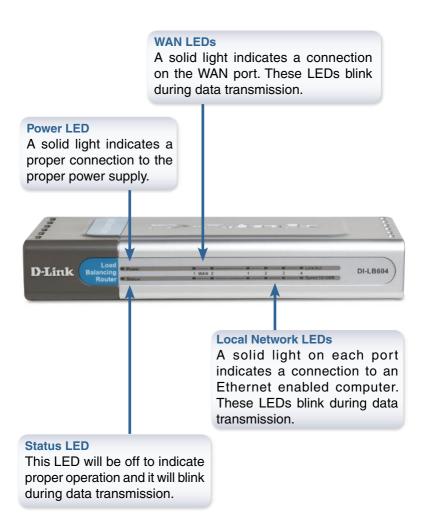

5V AC Power Adapter

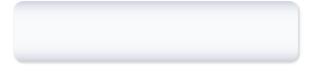

Using a power supply with a different voltage rating will damage this product and void the warranty.

If any of the above items are missing, please contact your reseller.

Hardware Overview Front Panel

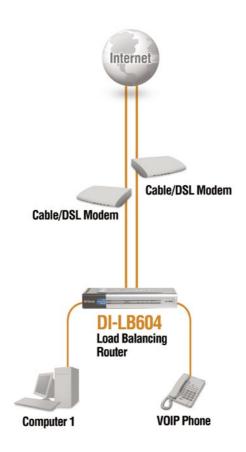

WAN Ports

This is for the connection of an Ethernet cable to your Cable or DSL modem.

Connecting The DI-LB604 Load Balancing Router To Your Network

- A. First, connect the power adapter to the receptor at the back panel of the DI-LB604 and then plug the other end of the power adapter to a wall outlet or power strip. The Power LED will turn ON to indicate proper operation.
- B. 1. Power off your Cable or DSL modem; some devices may not have an on/off switch and will require you to unplug the power adapter. Now, the DI-LB604 should be powered on and the Cable/DSL modem should be turned off.
 - 2. Cable/DSL modem (Power Off) DI-LB604 (Power On) Connect an Ethernet cable to the Ethernet jack located on the Cable/DSL modem. After the Ethernet cable is securely connected, power on the Cable/DSL modem by turning on the unit or plugging in the power adapter.
 - 3. Cable/DSL modem (Power On) DI-LB604 (Power On) Insert the other end of the Ethernet cable to the WAN PORT on the back panel of the DI-LB604. The WAN LED light will illuminate to indicate proper connection. If the WAN LED is not illuminated, please go back to step B1 and repeat the instructions.
- C. Insert an Ethernet cable to LAN port 1 on the back panel of the DI-LB604 and an available Ethernet port on the network adapter in the computer you will use to configure the DI-LB604. The LED light for LAN Port 1 will illuminate to indicate proper connection. (Note: The LAN Ports on the DI-LB604 are Auto-MDI/MDIX. Meaning you can use a straight-through or crossover Ethernet cable to the LAN Ports.)

Getting Started

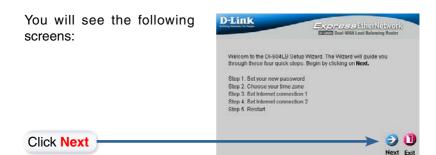

Using The Setup Wizard

Open your Web browser and type "http://192.168.0.1" into the URL address box. Then press the Enter or Return key.

Set up your new password.

You have the option to establish a password for the username "admin".

Click Next

Choose your time zone from the drop down list.

Click Next

If you are unsure of which setting to select, please contact your Internet Service Provider.

Select the type of Internet Connection that is attached to WAN1.

Click Next

Enter the needed information for the type of connection you have chosen

Click Next

Select the type of Internet connection that is attached to WAN2.

Click Next

Enter the needed information for the type of connection you have chosen.

Click Next

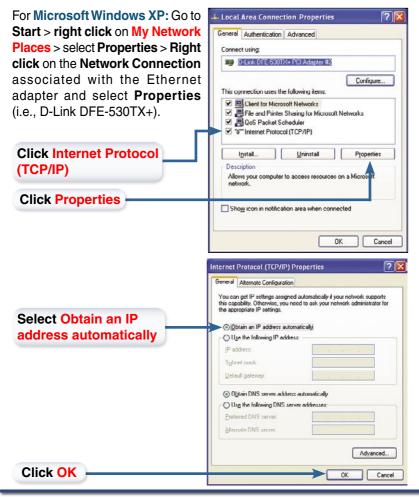

Your Setup is Complete!

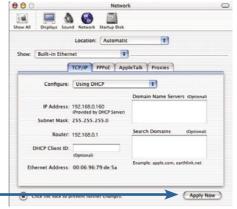

Click Next

To connect to the network, make sure the network adapter in your computer is configured properly. Here's how to configure the network adapter to obtain an IP address automatically for the DI-LB604 Load Balancing Router.

For Apple Macintosh OS X: Go to Dat Greet Managined Lager Scowe Lawr Unioned Network Location: Automatic Manually Select Using DHCP Manually using DHCP Router ✓ Using DHCP in the Configure pull Using Boots down menu Subnet Mask: 255.255.255.0 Search Domains Router: 192.168.0.1 DHCP Client ID: Ethernet Address: Click the lock to prevent further changes.

Restart your computer (if necessary)
